## A. How To's

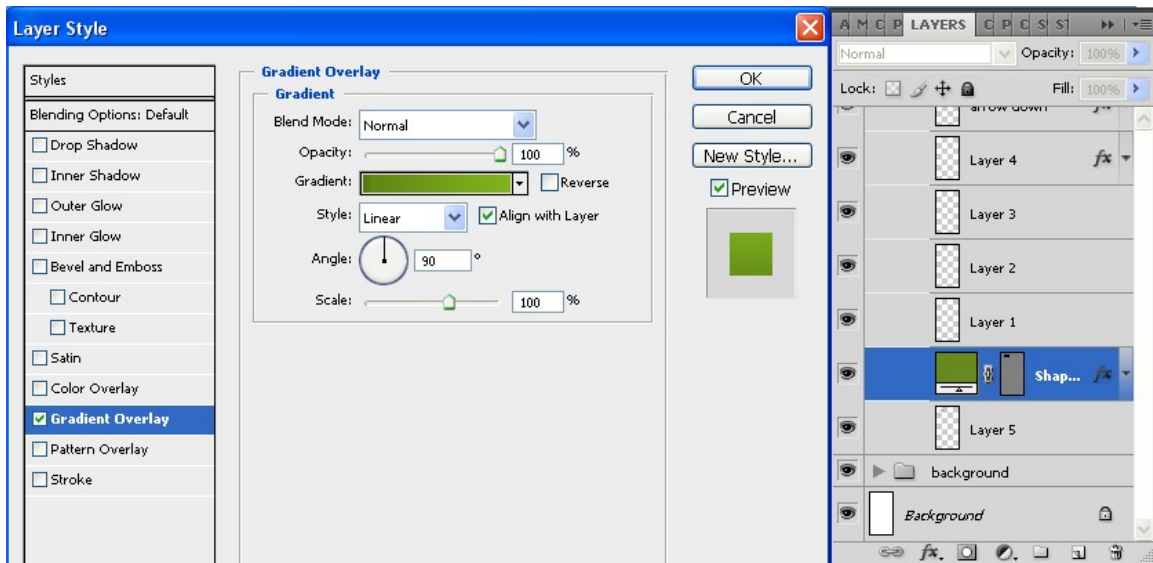

### How to Open the PSD file

- Uncompress the final.zip and open the psd folder and double click or open the **layout.psd**

### How to Change the color of the button

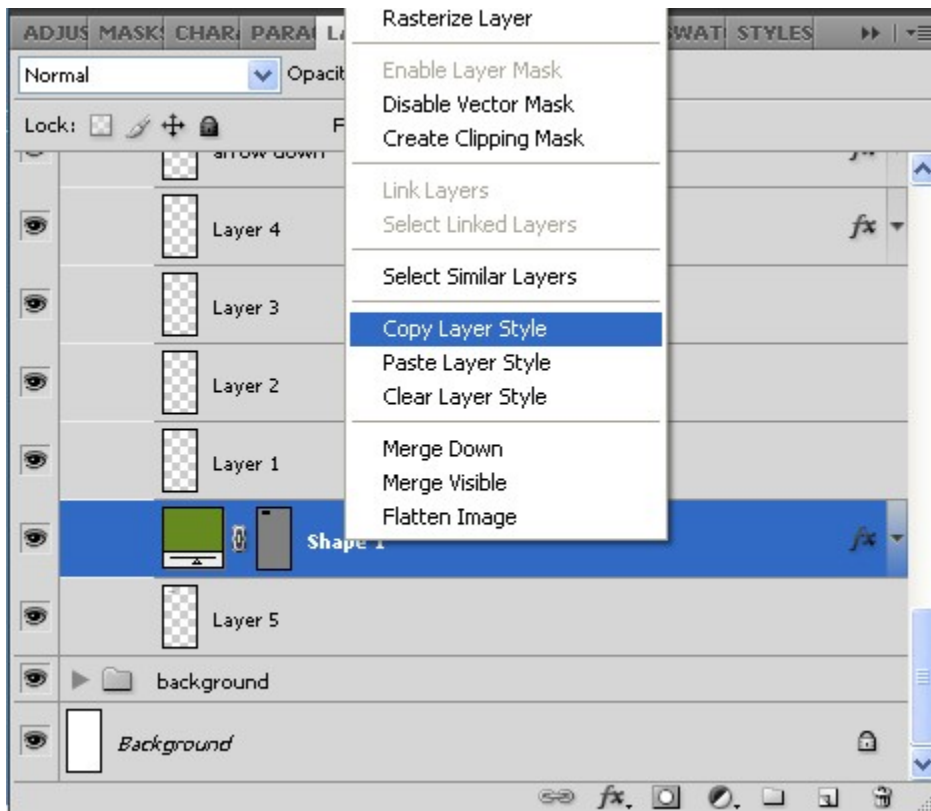

Locate the shape1 layer on the **Layers tab** and right click the shape1 layer then go to the **gradient overlay**, then select a color.

See below image:

Or else, if there's a button that already styled, or has a gradient overlay sets already and you decided to copy the style. You just need to right click the layer and click the **Copy Layer Style** then right click the layer that you want style into then click **Paste Layer Style**.

See the screenshot below.

**How to get the button and save it as .jpg, .png or .gif to be use to your own website.**

If you already finish editing the button, right click the **item** folder and click the **Convert to Smart Object**, then ctr + A or select all then copy and create a new document and paste.

Then save it as **Save for Web & Devices ( ctrl+alt+shift s )** then select an extension its either jpg, png or gif.

That's it!

## **B. PSD Files**

The psd file can be found in the psd folder inside the final.zip or final folder.

## **C. Resources or Credits**

I use two types of fonts here.

1. **League Gothic** - You can download it here <http://www.theleagueofmoveabletype.com/fonts/7-league-gothic>
2. **Pixelation** - You can download it here <http://www.dafont.com/pixelation.font>

## **THANKS A LOT**

Once again, thank you so much for purchasing this design. As I said at the beginning, I'd be glad to help you if you have any questions relating to this theme. No guarantees, but I'll do my best to assist. If you have a more general question relating to the design on GraphicRiver, you might consider visiting the forums and asking your question in the "Item Discussion" section.

Enjoy!

**Joefrey Mahusay**
